Dig`N`Fight. The creatures of the underworld are back!

If you always wanted to be a legendary and feared ruler, RedMoon Studios has just the right thing for you! The recently introduced game Dig'N'Fight offers players the unique opportunity to become the most feared and evil ruler of all times. This free build-and-conquer type game is thematically based on the cult game classic "Dungeon Keeper" and promises to deliver loads of fun.

The forces of evil have now returned in the form of the latest game from RedMoon Studios. In Dig'N'Fight the player's objective is to become the undisputed ruler of the underworld. For this purpose the player must construct an army such as the world has never seen. The player can satisfy his/her desire for fame and gold by constructing an undefeatable army made up of 15 types of creatures who are all eager to carry out the dastardly plans of their master. To become the owner of the largest dungeon, the player must dig his way through the underworld and construct an immense empire. The dungeon keeper has thousands of competitors who can be challenged to see who is the best. If the player would like to join a union of the most cruel and fiendish dungeon keepers, he/she can join a clan and battle the common enemy.

All players whose greed for gold and fame knows no bounds can register for Dig'N'Fight at no cost under: www.dignfight.co.uk. There the player will find an entertaining adventure with many creatures and foes. The structured menu layout enables the player to quickly grasp the game management. The witty graphical user interface helps the player on the journey into the unfathomable depths of the underworld.

To play Dig'N'Fight all you need is an internet connection and a PC. No software installation or downloads are necessary.

Dig'N'Fight delivers lots of fun and surprises.
